

GUARANTEED Precisely right.

OpOne is a full-service manufacturing group for precision components. With highly skilled teams and innovative technologies throughout our three subsidiaries, we work collaboratively to offer competitive solutions for a wide range of parts and sub-assemblies that are manufactured and machined precisely right every time, on time.

SERVICES

We specialize in highly flexible automation that gives us the unique ability to maximize utilization and skill, while maintaining low costs, to provide prototypes through low and mid volume production.

PROTOTYPE DEVELOPMENT

- Concept, 3D Design & Engineering
- Prototype Machining & Manufacturing

MACHINING

- CNC Milling & Turning
- CNC Multi-Axis
- CNC Lathe
- Wire & Conventional EDM

INSPECTION

- Open Layout Inspection Services
- Vision Measuring Inspection Services
- CMM
- In-process Testing

GRINDING

- Close Tolerance CNC Surface Grinding
- Precision Jig Grinding
- Cylindrical Grinding

PRECISION TOOLING

- Engineering Design
- Full Tool Build
- Complete Tool Validation
- For Precision Gages, Tooling, Fixturing, Jigs, Stamping Dies and Molds

The OpOne Group Advantage

THREE PARTNERS FOCUSED ON PRECISION.

PROVEN PROCESS + QUALITY

Ensuring every job is done precisely right begins with our OpOne Group wide focus on our proven process and a commitment to following it. From design and engineering to production and inspection, each step in manufacturing your component is carefully monitored. Our technology, equipment and materials are expertly tested and maintained to ensure exactness and consistency. With rigorous inspection and process controls throughout production, we are able to guarantee it's been done right.

EQUIPMENT + TECHNOLOGY

OpOne Group is dedicated to continually making investments in the latest technology, cutting-edge equipment and flexible modular automation. This strategy has allowed us the opportunity to attract and build long-term relationships with innovative companies from startups to global enterprises. We take pride in consistently and efficiently delivering high-quality components to meet each of our customer's unique needs.

EXPERIENCE

Bringing together six decades of manufacturing and machining experience, OpOne Group's highly skilled team members have the knowledge, expertise and technical competence it takes to get each job done precisely right from prototype development to delivery.
